

Shaped sticky note-pad guidelines

Please refer to this document to ensure your order is set-up correctly.

Overview

Shaped sticky note-pads can be created to replicate products or promote a service. We can cut a standard sticky note-pad into a range of sizes

Sizes

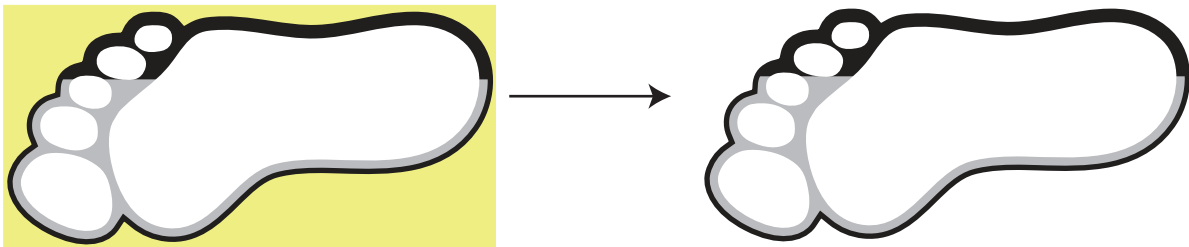

The smallest size we can cut a shape from is 75 x 75mm. The largest size is 200 x 250mm.

Limitations

We cannot cut sharp or intricate shapes as this causes the paper to tear or break away from the main pad. We also recommend using a minimum of 25 sheets per pad.

Bleed & Tolerance

Extra bleed has to be applied for shaped pads and will depend upon the shape. We recommend a minimum of 5mm but may require 8mm. Text and important graphics should be kept a minimum of 5mm from the edge of the shape. We will advise you on bleed requirements on approval of the shape.

Shape is printed onto a standard sized pad

Shape is cut to desired shape

Glue Track

We recommend the glue track runs along the longest edge to ensure the sheets have the maximum adhesive strength.
